

## New ! ColorSolve Classic inks from AIT Shiraz !

### What are ColorSolve Classic inks ?

ColorSolve Classic inks are a compatible alternative to Mimaki solvent inks, formulated and manufactured exclusively for AIT Shiraz, giving consistent colours and performance without the need to re-calibrate your system.

### Why swap to ColorSolve Classic ?

ColorSolve Classic inks offer significant long term cost savings over Mimaki inks without compromising on quality of output, machine reliability or performance.

### Does it work with the existing RIP profiles for Mimaki printers ?

ColorSolve Classic inks have been closely colour matched to Mimaki inks so the same profiles may be used. Only the most discerning colour specialists can tell the difference when comparing like with like.

### Are ColorSolve Classic inks of good quality and reliable ?

A world-class manufacturer with a genuine commitment to quality produces ColorSolve Classic inks using the finest raw materials and modern production techniques. The inks are subjected to extensive testing during both the development and production phases, they carry full UV fade resistance warranties and are manufactured to strict ISO9001 quality standards. They have also been thoroughly tested in real working environments and finely tuned for superior machine performance and reliability.

### Do the old inks have to be flushed from the printer ?

There is no need to flush the Mimaki ink from the printer providing a quick, simple and clean change over. Simply swap over to ColorSolve Classic cartridges in turn when your old Mimaki cartridges run out.

### Does it work with all Mimaki printers ?

There is a ColorSolve Classic ink for all Mimaki solvent printers regardless of its type, age or firmware version. See the Compatibility Chart below to find out which ColorSolve Classic ink matches your printer.

### What is the shelf life and will it work after the Expiry Date ?

ColorSolve Classic ink has an extended shelf life of 18 months but can be used after the Expiry Date at your discretion and the cartridge won't be rejected.

### Is it necessary to over laminate prints if used outdoors ?

ColorSolve Classic ink offers excellent resistance to alcohols and cleaning fluids and is UV light resistant up to 2 years outdoors in the UK or other Northern European location subject to media selection and print positioning. It has superior abrasion and scratch resistance.

### Will the printer warranty be supported if I swap to ColorSolve inks ?

AIT Shiraz offer a full and comprehensive engineering support, with access to genuine parts sourced from our partners in the UK and overseas, and will warrant all parts coming into contact with ColorSolve Classic where any existing warranty may have been compromised.

### Compatibility chart

Mimaki printer model	Mimaki Ink type	Colorsolve Ink type
JV3 series	SS2	Classic 2
JV33 series, CVJ series	SS21	Classsic 21
JV5 series	HS	Classic H5
