

- 1. Multiple input stations via client/server network**  
Separate design and server modules allow any number of design stations to submit jobs to the server over the network. The design module can be loaded on any Windows, Mac OSX or Linux computers free of charge.
- 2. Multiple printers - simultaneous job queues**  
Multiple printers can be driven simultaneously from the same server - the actual number limited only by your computer's specification.
- 3. Scalable product**  
However, Shiraz V6 can be configured as a simple stand alone product as well as a sophisticated multi-client/server setup - and it can "grow" to meet changing user requirements.
- 4. Mac OSX and Linux OS server platforms**  
Unique choice of Windows, Mac OSX or Linux operating systems - with Shiraz V6 looking and working exactly the same way on all three platforms. (The security dongle supplied is fully cross-platform and can be used on any operating system required.)
- 5. Advanced GUI - easier, faster to use**  
Advanced graphical user interface technology gives a much improved look and feel, making it easier and faster to operate.
- 6. Improved colour management - better linearization and ink limiting**  
Shiraz V6 features the Gretag Macbeth colour management engine as part of its ICC technology as well a much improved and more accurate linearization technology. Special ink limiting features ensure maximum colour gamut with minimum ink usage to improve drying time and costs.
- 7. Updated Postscript - better compatibility with the latest design applications**  
The latest JAWS PS interpreter ensures compatibility with the most advanced design applications, such as Adobe Creative Suite and QuarkXPress.
- 8. Better screening technology**  
Improvements in the error diffusion algorithms mean higher quality output.
- 9. Much improved nesting features**  
Automatic 2D nesting algorithm ensures most efficient use of media. User parameters can be set to change the nesting behaviour to suit production requirements.
- 10. Far easier and faster tiling and cropping**  
Improved tiling/cropping features make for an easier, more interactive experience. Tiling jobs now ripped on the fly for much faster throughput.
- 11. Faster processing of jobs**  
Drastic speed improvements all round brings faster ripping and screening.
- 12. Support for all latest printer models**  
Up-to-date list of printer drivers and associated colour profiles supplied as standard
- 13. Better printer control - bi-directional printer communication**  
Two-way printer communications allows monitoring of ink levels, media loaded and error messages.
- 14. Support for multi-channel output - white ink support**  
Shiraz V6 supports all contemporary printer models' colour channel configurations - including white ink.
- 15. Much easier profiling procedure**  
Profiling wizard allows even novice users to follow a step-by-step procedure to create very high quality media profiles every time.
- 16. New media profiles - ongoing improvements**  
Comprehensive on-going development program ensures new and improved features in response to user feedback.
- 17. Number of tools to enhance the use of the RIP**  
Wide variety of additional utilities included to enhance the RIP - such as automatic update and font loader. The licence can also be upgraded remotely to add any additional options or modules required.
- 18. Automatic remote updating**  
Media profiles and program modules can be updated via remote updating system connecting to our fast FTP sites.
- 19. Comprehensive online help system and training video**  
The Shiraz V6 package includes an interactive training DVD, user manual and comprehensive online help.
- 20. Universal security key (dongle)**  
Shiraz V6 is supplied with an interchangeable cross-platform dongle key that can be used for all three supported operation systems; Windows, Mac OSX and Linux.
